

Steven Eng has over 36 years of experience working in regulatory administration of environmental health and community care facility licensing regulations. He has worked in the capacity as a field licensing regulator conducting inspections and complaint investigations, as a program manager overseeing a small team of licensing practice consultants, and guiding the development of information systems to support current and evolving business needs of the regulatory business area.

In addition to his role with NARA, Steven has worked in several public health departments in Alberta and British Columbia, Canada. His current work is as the Manager of Technology, Planning & Integration in the department of Population & Public Health at Fraser Health Authority (one of five health authorities in B.C.). He continues to support the information systems used by the Licensing program at his agency as well as other systems used in public health.

Steven attended the University of British Columbia where he earned a B.Sc. in zoology, the British Columbia Institute of Technology earning a B. Tech in environmental health, and the University of Washington in Seattle, WA earning a Master's in Public Health degree. Steven also holds a Certificate in Public Health Inspection.
